GENERAL INFORMATION

This 2nd edition in a series of three newsletters proudly presents another selection of Highlights from the 6 breeders participating in this year's FlowerTrials® at Green05 in Maasdijk during Flower Trials 2018. Don't forget to register online! We welcome your visit!

Brandkamp

Brandkamp cultivates chrysanthemums and bedding plants and produces young plants.

The successful Lantanen "Tropic Lantana" received for 2018 three new varieties. Batida (white), Tamarillo (yellow/orange) and Mango (yellow/pink) complete the tropical range. Like all Tropic Lantanas they convince by a perfect compact growth as well as an early and long lasting flowering.

DHM Innovation

DHMI is a leading breeding company in Mandevilla, with over 20 commercial varieties.

The dipladenia type DIAMANTINA® Jade 'Orange Coral' is very compact and branches beautifully. The unique eye catching colour is a shade of orange with yellowish and reddish touches. The flowers are slightly smaller than a typical dipladenia type but come in numbers.

Schneider youngplants

Schneider youngplants offers a wide range of annual, biennial and perennial plants.

Our best seller Primula series is a market leader for mid-early season sales. This series sets the standard for uniform plant habit, flower size and quality. The intensive colors of the large flowers (5-6 cm across) makes them really showy plants, for pot plant use, bedding or mixed containers.

Butterfly Garden

Butterfly Garden is a breeder and producer of ornamental plants, cutting and young plants, a.o. Lavandula stoechas.

Our Lavandula stoechas series consists of several varieties for modern programmed cultivation. We will also show 'Endless Joy®' - our new Lavandula angustifolia. The variety forms very compact, healthy and uniform plants with many large, deep blue flower heads.

Prudac

Prudac serves the professional and the hobby market with easy-to-grow attractive, edible products.

Rocket Pepper F1 Mamba Red gives medium spicy fleshy fruits and has a large fruit production. No insects are needed for production of the fruit. The fruits colour in 16 weeks after sowing. Rocket Pepper F1 Mamba Red is suitable for production in 15-17 cm pot and grows with low temperatures.

Varinova

At this moment Varinova has 9 F1 Cyclamen series with a large number of bright colours available.

Our best seller series Goblet, with remarkable goblet shaped flowers, offers firm flower stems, abundant flowering and guarantees a long flowering outside. The white flower edges make that the flowers give extra sparkle to your garden. Very suitable for borders, terrace and flower boxes on the balcony.
